Giriş

Telefon defteri projesinde sadece web arayüz değil tablet ve dokunmatik ekranlara uygun şekilde liste görünümü daha user friendly olur diye düşündüm. İş yerimde Kendo ve primeNG kullanıyorduk. Grid görünümü ile columnlar üstü filtreleme yerine tüm fieldlarda arayan search daha kullanışlı geldi. Add, update ve delete yapmaktadır. Resimleri kaydederken base64 ile database içinde tutmak yerine file directory içine atıp pathlerini database entity olarak tutuyorum. Bootstrap kullandım. Edit delete alanları hem detail kısmında hem de listede olması her yerden erişilebilirlik sağlıyor. Telefon numarası ve email için restrictionlar varken register numarası sadece numara kabul etmektedir. Tablolar migration ile oluşturulmuştur. Bu da code first bir yapı sunmaktadır. Layout ile birlikte viewlar daha düzenli, temiz ve kullanışlı olmuştur.

Database - Mysql Workbench – Migration - File Upload Directory

Navigator: Schemas: Filter objects: fihrist, failed_jobs, migrations, password_resets, people, users, Views, Stored Procedures, Functions, fihristpeople, sys

Query 1: people people people people people people people people people
